

# High Speed DC/DC

## Kaga Electronics/Volgen High speed response/low noise/high output DC/DC converters

Kaga's V series of high grade DC/DC converters and POL offers a selection of low noise, high speed and high output voltage units ranging from 1.0VDC to 2000VDC output. The V series are feature packed including user adjustable output voltages, thin ultra-small casing (4mm), isolated and non-isolated outputs and ripple noise as low as 3 mVp-p.

Applications include but are not limited to medical equipment, information/communication instruments, optical, measurement and various industrial applications.

### Features

Adjustable outputs

Ultra thin/ultra small

Low noise/non-isolated

High speed response

Temperature range from -40°C to 85°C
