

EverLED-TRTM and EverLED-VETM Direct Drop-In Fluorescent Tube Replacements

Instantly upgrade your present 4 foot fluorescent fixtures to clean, safe, long lasting LED technology without removing or bypassing the ballast!

- Eliminate the need for costly replacement or modification of existing fixtures.
- EverLED's advanced patent-pending driver technology is compatible with virtually all standard fluorescent ballasts.
- Retaining the ballast maintains the fixture's UL Safety Rating.
- Not having to modify the fixture means significantly less interruption and labor cost savings.
- EverLED's highly efficient design dramatically reduces energy costs, extends ballast life.
- Ten-year life expectancy eliminates re-lamping cycles for a decade.
- Removing mercury, lead, toxic phosphors, and fragile glass from your environment and waste stream means a safer, healthier work place, and no hazardous material disposal costs.
- No EMI noise to interfere with sensitive equipment in hospitals and laboratories.
- No stroboscopic effect (flicker) that causes eye strain and headaches among sensitive people.
- Instant on with virtually no glare for a more pleasant light.
- Superior color rendering so people and objects appear more natural.
- Works well with occupancy sensing, dimming, bi-level switching, and emergency ballasts.
- Works well in cold temperatures down to -40°C. EverLED's light output actually increases by 20% at 0°C, whereas fluorescent tubes suffer a 50% decrease in light output.
- The EverLED-TRTM is the first commercially available "drop-in" fluorescent tube replacement and is "overbuilt" utilizing larger over-rated LEDs, thus they are under driven. EverLED-TRTM carries a Ten Year warranty.
- The EverLED-VETM is the newest member of our family of 4ft retrofit products. The design engineers at LEDdynamicsTM based the EverLED-VETM on the reputable EverLED-TRTM. Capitalizing on the new smaller high-brightness LEDs. The EverLED-VETM drives them slightly closer to their maximum rating for a light output within 10% of the EverLED-TRTM while hitting a lower price point. Other than the LEDs, the VE uses the same high quality components used in the EverLED-TRTM and has a Five Year warranty.
- All our EverLED products are designed and manufactured in the US.
