

The Sullins Advantage

Sullins Builds Solutions Need a standard connector or a special one built to your specifications? We'll help you find the perfect fit—fast! And we offer more design choices than any competitor out there.

High Quality Connectors Our in-house manufacturing facility in California employs the latest production methods and rigorous quality control to deliver reliable, high quality connectors—every time.

Five-Day Turnaround* Your project is important to us, so fast delivery is our primary goal. The average lead times are less than five days, and many orders ship the same day. We strive to provide you with the best quality products in record time. Great products, delivered fast! Our goal is to keep your project on track.

Technical Expertise Sullins' team of applications engineers and technical experts are standing by to help you develop your connector solution—from concept to production—that's specific to your application. They'll provide all the resources you need to tackle design challenges and bring your project to life.

RoHS Compliant Being good to the environment is important to us and our customers. That's why we only use RoHS compliant parts in all our products.

* While our average delivery time is within 5 business days, some connector designs with more customized specifications may require additional time to complete.
