Automotive Ethernet Converters

The NETLion 10G development tool is essential for converting Automotive Ethernet to standard PC Ethernet. It offers a TAP mode for decoupling and separately reading out data from both transmission directions.

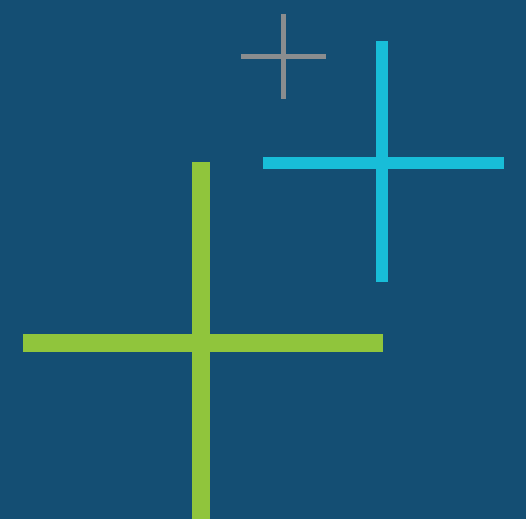

NETLion 10G

Specifications

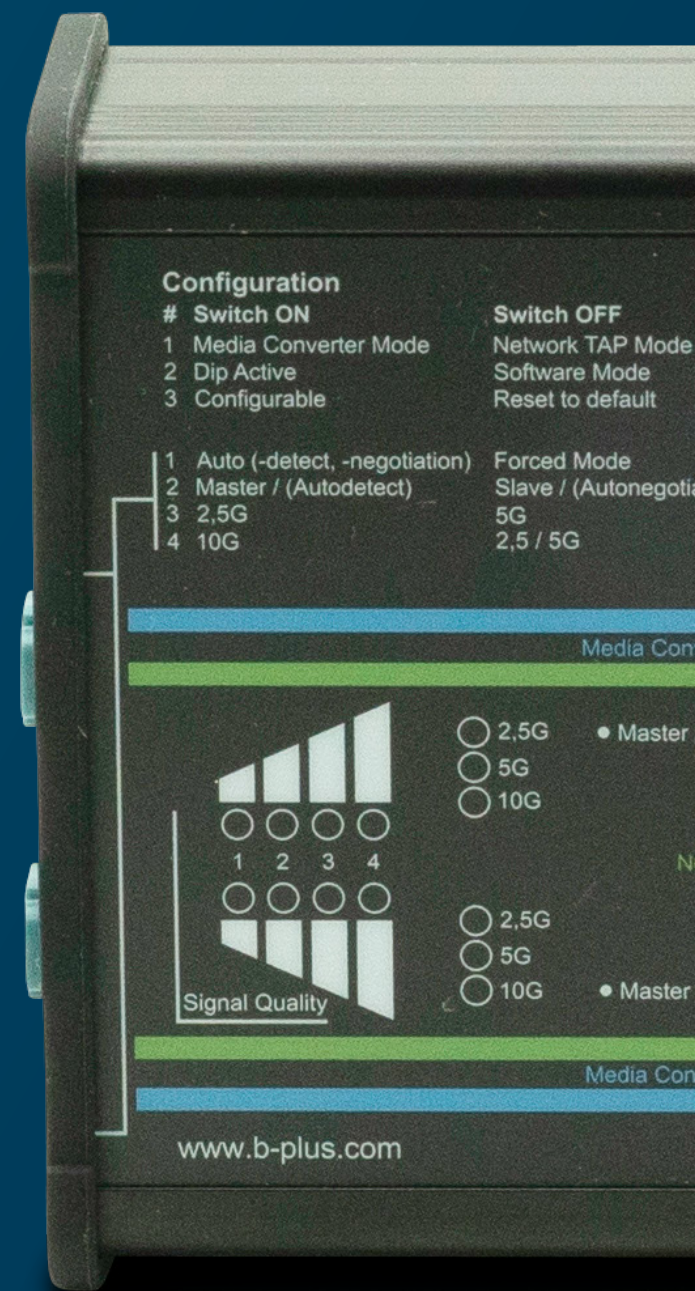

- + 2.5GBASE-T1 / 5GBASE-T1 / 10GBASE-T1
- + Dual Media Converter
- + Network TAP
- + H-MTD connector
- + Wide range input: 9 - 32 V
- + Ethernet Layer 1 Data Transmission

NETLion 10G

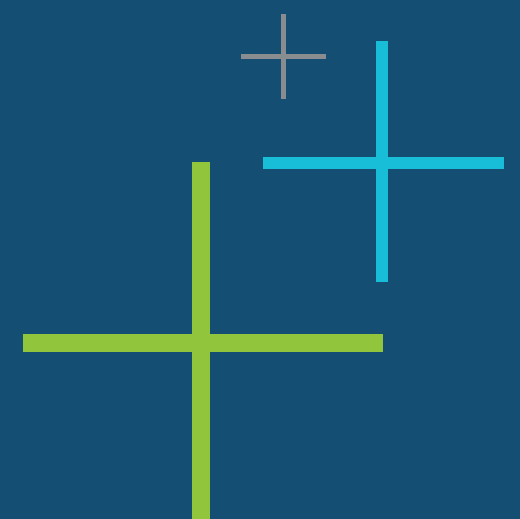

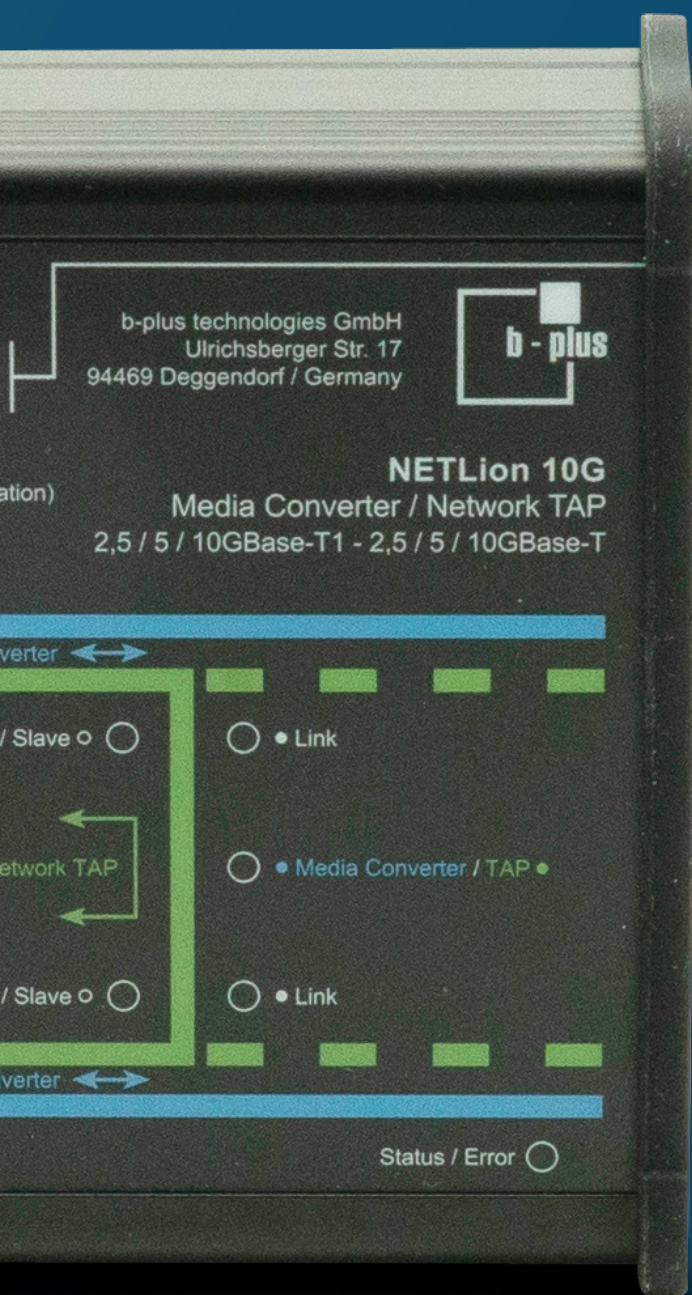

Key Features

- + Versatile use
- + Data to rely on
- + Flexible configuration
- + High transmission speeds

NETLion 10G

- + **Visual feedback**
through numerous LEDs
- + **Easy configuration**
through DIP switches
- + **Advanced configurations**
via webinterface
