QUINT POWER

Low wattage and space-saving

QUINT POWER Low Wattage provides premier system functionality in the smallest form factor ranging from 30 W to 100 W. The additions to our QUINT POWER supplies are designed for critical applications that may have spacing limitations. These low-wattage QUINT POWER supplies are also available with push-in or screw connections options for easy installation!

Your advantages

- ✓ Starting inductive loads with a dynamic boost of up to 200 percent the nominal output current
- ✓ Preventive function monitoring indicates critical operating states before errors occur
- ✓ High efficiency and long service life with low power dissipation and low heating
- ✓ Compact design creating space-savings within the control cabinet
- ✓ Choice of connection technology: screw or push-in contacts
