

TRIPLETT ROUND-UP

Extreme Weather Cleanup & Restoration Issue

After the Storm - Safely Evaluate Damage During Cleanup

Gas Meters

Flooding can damage natural gas meters and appliances. Check out our Combustible and CO handheld gas meters and see how they can help you in checking your indoor air quality for dangerous Carbon Monoxide or combustible gas leaks. Having one of these on hand will provide peace of mind and ensure your environment is safe. Your best defense against dangerous gas leaks is to detect problems quickly and immediately know who to call when those problems arise.

GSM120

Portable Carbon Monoxide meter

GSM120

Portable Carbon Monoxide meter

GSM050

Portable Combustible Gas Detector

Identifies as Methane, Hydrogen, Carbon Monoxide, Propane, Ethylene, Ethane, Hexane, Benzene, Iso-Butane, Ethanol, Acetaldehyde, Formaldehyde, Toluene, P-Xylene, Ammonia, and Hydrogen Sulfide as well as common mixtures such as Natural Gas.

GSM100

Combustible Gas Leak Detector with Flex Gooseneck

Checks for the presence of propane (LPG) from 500 to 6500 ppm or natural gas (LNG) from 1000 to 6500 ppm.
